

**Amendments to the Specification:**

Please amend the fourth full paragraph on page 2 as follows:

The liquid crystal display is preferably rendered preferably based on a pixel group for rendering including a center pixel and a plurality of peripheral pixels having weights depending on a distance from the center pixel. Preferably, the weight ~~decreases~~becomes large as the distance from the center pixel increases.

Please amend the second full paragraph on page 3 as follows:

The weight preferably ~~decreases~~becomes large as the distance from the center pixel increases.
